Nest.js (2)	Redux (4)	Redis (2)
Docker (2)	Jira (2)	Microsoft Power Apps (1)
Jest (4)	GIT (5)	REST APIs (4)
CI/CD (2)	Azure DevOps (2)	Microsoft Power BI (1)

### WORKEXPERIENCE

10/2022 – Till Date

Principal Full Stack Engineer (Team Lead)  
Zones IT Solutions (Remote)

Project: Zones Digital Transformation is an initiative to revamp Zones Digital Presence. Zones is a multinational billion-dollar reseller which is providing IT services since 1986.

I am leading a team of 7, responsible for multiple apps of ZDP(Zones Digital Platform).

Developed an ETL tool capable of seamlessly extracting and loading data across various platforms including Relational Databases, Cloud services, FTP, and Magneto.

Engineered a Master Data Management system with the added functionality of generating dynamic data models directly from the user interface.

Created a Power App to collect and categorize customer feedback from various channels.

Integrated the feedback data with Power BI for comprehensive analysis.

Technologies used: Typescript | React.js | Material UI | Microsoft Power Apps | Microsoft Power BI | Redux | 2FAAuthenticators | Jest | Node.js | Express.js | GraphQL | TypeORM | MariaDB | Redis | Azure 2FA | Docker | Git | Azure DevOps.

02/2022 – 10/2022

Full Stack Engineer  
Karachi is a mobile application where user can search Synergates Business Solutions Karachi, Pakistan marriage halls with advance filters such as location, price, capacity etc.  
Project:

Designed and implemented scalable application programming interfaces.  
Built Mobile Application using Flutter, UI Portal using React.js, Redux.

Technologies used: Typescript | React.js | Flutter | Redux | Redux thunk | Material UI | JSON schema | Jest | Node.js | Express.js | Docker | Git | Confluence | Jira.

07/2021 – 01/2022

Mobile Application Developer

Technado (Binate Digital), Karachi, Pakistan

Project: AxEase is a trip tracking service for daily commuters and essentially to be used for people using hired transport services for daily intra-city traveling. The goal of this app is to make the daily ride convenient and free from any anxiety. HASSLE-FREE DRIVE Avoid informing multiple people about the ride progress & delays.

Developed the frontend of the app from scratch using Flutter and Provider. Provided the functionality for parents to live track their children location while using school/college vab

Technologies used: Flutter | Firebase Storage | Cloud Firestore | Firebase Push Notifications | Git

Project: Dukani is a multi vendor e-commerce platform

I built both Android and iOS mobile applications using Flutter from scratch

Implemented features like e-wallet, real time chat, firebase push notifications, json schema based dynamic forms, social logins, OTP and stripe payment gateway integration.

Developed 20+ custom components for reusability. I led the project right from the beginning from requirement gathering to mockup designs to final production deployment.

Technologies used: Flutter | Android | iOS | Rest APIs  
Stripe | Firebase | Git | Social logins

02/2021 – 07/2021

Mobile Application Developer ReactTree Karachi, Pakistan  
Project: Coffee Wagera Application gives you an opportunity to earn points every time you buy something from their cafe. One point is equivalent to 1 Rupees which you can use on your future orders. You can also check their menu in this Application, search for their locations

Collaborated as a co-developer with the team to integrate social login functionality into the application.

Technologies used: Flutter | Firebase Storage | Cloud Firestore |

Firestore Push Notifications | Git | Social logins
